Trakm8 extends Telematics range with acquisition of Vincotech Telematics Products

Trakm8 is delighted to announce that it has acquired the telematics hardware assets of Vincotech. This brings into the product family of Trakm8 further hardware platforms including the recently launched A1091 Telematics module.

Trakm8 intends to continue to meet the existing demand for these products and to further expand them as the market requires. Trakm8 has a long history of supplying the industry with hardware units having supplied over 160,000 units since the company's formation in 2002.

John Watkins, Trakm8 CEO, said "We are delighted with this addition to our product range. As a highly focussed Telematics company these products are core to our business. We will be contacting all existing Vincotech customers to assure them of our continuing support and working with them to ensure an orderly transfer of supply."

Press Release

Eckart Seitter, Vincotech Vice President Sales & Marketing, said “We are pleased to have found for our customers worldwide a very competent and experienced partner to carry on our leading-edge A1091 telematics platform. Trakm8 is a company we have known since 2002 and we value them as a very reliable partner who can offer full hardware support and also their extensive knowledge in telematics software solutions”.

ABOUT TRAKM8

Trakm8 is a vehicle telematics company based in Dorset, UK and is listed on the Alternative Investment Market (AIM). It was founded in 2002 and has sold over 160,000 tracking units worldwide. Trakm8 designs and manufactures complete fleet management hardware and software solutions and pride themselves on their ability to tailor products precisely to a customer’s fleet management, reporting or informational needs. Trakm8 also owns innovative technology that allows data to be retrieved from a vehicle’s onboard computer. This allows live data coming directly from the engine management system to be viewed at base. A wide range of information can then be monitored by fleet managers to optimize the utilization and cost effectiveness of their fleet by measuring numerous factors such as fuel usage, CO2 emissions and driver behaviour.

ABOUT VINCOTECH

Vincotech develops and manufactures subsystems and electronic components and offers manufacturing services geared to help customers to master complex challenges in electronics integration. Vincotech’s extensive portfolio encompasses standard and tailored solutions, engineering services and technical support for customers worldwide. These products and services contribute to sustainable, environmentally sound solutions that help modern society embrace mega-trends and explore new paths.

With approximately 500 employees worldwide, backed by vast experience and a long history in electronics integration, Vincotech leverages these assets to help customers achieve maximum market success.
