VINCOTECH OFFERS NEW HOUSING OPTIONS FOR THE *flowPIM 0* FAMILY

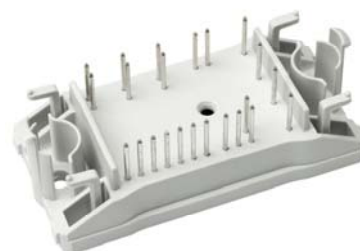

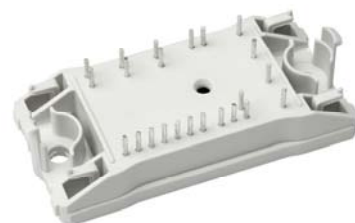

-- *flowPIM 0 600V is now available in a new 2-clip housing.* --

Munich/Germany, May 04, 2010 - Vincotech, a supplier of module-based solutions for power electronics, today announced the release of new housing options for *flowPIM 0*. The *flowPIM* family's 600V versions, with amperage ranging from 6A to 30A, are now also available in new 2-clip housings with heights of 12 and 17 mm.

The *flowPIM 0* family is designed for all industrial drive applications with up to 3kW output power. The modules contain the power components required for an input rectifier and an inverter circuit. A brake chopper is optionally available. Featuring a built-in NTC, *flowPIM 0* products offer excellent electrical insulation and thermal conductivity capabilities, and a footprint designed to support optimized power flow on the PCB.

With the new *flow 0* 2-clip housing, Vincotech offers a best-in-class mechanical mount for power modules. The module clips straight onto the PCB, with no need for mounting screws. The housing comes in two heights to suit different system designs. The 17-mm version allows SMD components such as the driver IC to be placed under the module. The 12-mm version enables highly compact designs.

Vincotech is already manufacturing the new *flowPIM 0* modules and samples are available. To learn more, please visit http://www.vincotech.com/en/products/power/flowPIM_0

ABOUT VINCOTECH

Vincotech develops and manufactures subsystems and electronic components and offers manufacturing services geared to help customers master complex challenges in electronics integration. Vincotech's extensive portfolio encompasses standard and tailored solutions, engineering services, and technical support for customers worldwide. These products and services contribute to sustainable, environmentally sound solutions that help modern society embrace mega-trends and explore new avenues.

With approximately 500 employees worldwide, backed by vast experience and a long history in electronics integration, Vincotech leverages these assets to help customers achieve maximum market success.
