VINCOTECH – FIRST IN SiC-BASED POWER MODULES

-- The experts in smart, selective use of SiC-driven Modules --

Unterhaching/Munich, Germany – June 05, 2018. Vincotech, a supplier of module-based solutions for power electronics is the go-to source for SiC-based power modules that boost efficiency and enable more compact designs. No one has shipped more SiC-driven power modules than Vincotech, so the company knows when SiC components are best for the customer's application and when another option is the wiser choice. The company today released a brief summary of the benefits of these power modules.

Engineers tasked to build better devices and applications want power modules that boost efficiency and performance. Yet they also need compact solutions that shrink the component footprint. Vincotech's SiC-based power modules for charging stations, solar inverters and other applications square that circle. These modules not only deliver better switching performance; they also enable customers to design smaller, lighter systems. Vincotech, the expert in smart, selective use of SiC-driven power modules, has been empowering customers' ideas for 20+ years now. The company draws on multiple qualified suppliers for its SiC MOSFETs and SiC diodes.

Main benefits

- / Greater efficiency
- / Higher switching frequency
- / Excellent power density
- / Smaller, lighter inductors
- / More compact design

A quick run-down of the latest innovations featuring various SiC components follows:

Application	Product line	Part number	Voltage	Current	Features
EV Charger	<i>fast</i> PACK 0 SiC	10-PC094PB017ME02-L620F36Y	900 V	140 A	High efficiency, high switching frequency
		10-PG12NAB008MR02-LC59F36T			Solar three-level string inverter, extremely compact, highly efficient
Solar	<i>flow</i> ANPC 1 split	10-PG12NAC008MR02-LC69F36T	2400 V	150 A	High frequency, high efficiency (Dual Boost with SiC MOSFET)
Solar and UPS	<i>flow</i> BOOST 1 dual SiC	10-FY12B2A040MR02-L387L63	1200 V	30 A	High frequency, high efficiency, compact (Triple Boost with full SiC)
Solar and UPS	<i>flow</i> 3xBOOST 0 SiC	10-PZ123BA040MR01-M909L68Y	1200 V	20 A

ABOUT VINCOTECH

Vincotech is a market leader in power semiconductor modules. An group company of Mitsubishi Electric Corporation, the company excels at developing and manufacturing high-quality electronic power components for motion control, renewable energy, and power supply markets. Vincotech understands customers' needs and furnishes both off-the-rack and applications-specific solutions to ensure they are met.

Tapping the considerable engineering and electronics integration skills and experience of some 800 employees worldwide, the company collaborates with the customer to develop the best solution for the given application. And Vincotech's workforce embraces the principle of reliable partnership to deliver on its performance promise of speed and flexibility to customers' best benefit.
