VINCOTECH'S MODULES NOW FEATURING NEW SILICONE-FREE, PRE-APPLIED TIM

-- Silicone-free thermal interface material now approved for first power modules --

Unterhaching, Germany – October 20, 2015 – Vincotech, a supplier of module-based solutions for power electronics, today announced the approval of silicone-free of Müller-Ahlhorn Thermigrease® TG 20032 for the company's power modules. MiniSKiiP® modules are the first to ship with this pre-applied silicone-free thermal paste.

Many applications, for example, automotive production lines, have severe requirements regarding silicone-free products. Responding to rising demand for silicone-free thermal paste, Vincotech recently investigated such materials for their technical and commercial viability, and then qualified and approved Müller-Ahlhorn Thermigrease® TG 20032 for the company's power modules. MiniSKiiP® modules are the first to ship with this pre-applied silicone-free thermal paste, with other Vincotech product families soon.

General features of pre-applied TIM:

- Thermal conducting material with optimized thickness
- Optimized thermal resistance
- Streamlined production process; no need for screen printing facilities
- Automated screen printing for utmost precision and reliability
