MiniSKiiP® MEETS HALF-BRIDGE IN VINCOTECH'S NEW LINE

-- MiniSKiiP®DUAL modules up to 90 kW for 650 V and 1200 V applications --

Unterhaching, Germany, May 10, 2016: Vincotech, a supplier of module-based solutions for power electronics, today announced that new half-bridge MiniSKiiP®DUAL modules have been added to the standard MiniSKiiP® product line, thereby extending the power range all the way up to 90 kW for 650 V and 1200 V applications.

Equipped with solder-free spring-contact, Vincotech's MiniSKiiP® half-bridge modules can now replace baseplate modules with screwed bus bar connections to drive down inverter package and manufacturing costs by as much as 15 %.

MiniSKiiP®DUAL modules provide 100 A to 400 A nominal chip current for scalable designs in the 40-to-90 kW range. They feature the latest chip technologies (1200 V IGBT4 and 650 V IGBT3) with anti-parallel CAL diodes in the standard MiniSKiiP® package size 2 & 3.

Samples may be sourced on demand from our usual channels.

ABOUT VINCOTECH

Vincotech – an affiliated company within the Mitsubishi Electric Corporation – develops and manufactures subsystems and electronic components and provides manufacturing services that help customers master complex challenges in electronics integration. Vincotech’s extensive portfolio encompasses standard and tailored solutions, engineering services, and technical support for customers worldwide. These products and services contribute to sustainable, environmentally sound solutions that help modern society embrace mega-trends and explore new avenues.

With approximately 500 employees worldwide, backed by vast experience and a long history in electronics integration, Vincotech leverages these assets to help customers achieve maximum market success.
